

With the Oil Men

G. V. McMan, who was in town yesterday, says that while there will be a lot of oil produced in the Texas field, he has an opinion that there will be no decline in oil, as there are many disappointments showing every day. Mr. McMan is very popular in Tulsa and all his friends here are strong for him and are sure that if there is going to be a lot of oil produced in Texas the Sinclair people are going to get their share.

F. A. Singler with the Standard Tank Car company of St. Louis, was in town yesterday on his way home to Texas and he said that there will be no great demand for gasoline and kerosene as to make it almost impossible to supply the demand for tank cars.

Thomas E. Elliott, prominent attorney of Nowata, is in the city and is putting over some very important legal oil matters. Mr. Elliott is one of the best young attorneys in the eastern part of the state, and is especially strong on oil leases.

John Mooney, who for years has held the reputation of having the

largest stock of aged liquor in St. Louis, and who was a life-long friend and admirer of Uncle Ben Ryan, the greatest entertainer of them all, sends the Uncle Ben Ryan's friends a reminder of the good old days in the way of a little of the elixir that makes things look pleasant, and each and all of Uncle Ben's friends are wishing Mr. Mooney long life and much prosperity. For many years, Mr. Mooney has furnished our United States Senate that wherewithal, when he wants a bottle of something extra good, and his retirement from business on July 1st will be regretted wherever the English language is spoken. Good old Mooney!

J. W. Sanders of the firm of Ratcliffe-Sanders, well known and very popular among the oil fraternity, is of the opinion that better water is all that is needed to make Tulsa's largest and best town in the mid-continent field.

Leon Thevin of the Continental Refining company, who is in the city for a few days, is strong for the new water system as proposed by the Spavinaw company.

TRADE WAITS HUNS' ACTION ON TREATY

Prices Hardened in Anticipation of Outcome as Caution Characterizes Exchange Session.

NEW YORK. June 20.—So far as today's stock market could be said to have any direct propelling force or definite factor, greater interest was evinced in the trend of events across the water than in domestic developments.

Reports of the resignation of the German cabinet were in circulation before the opening, and are believed to have accounted for the early, though brief duration, of the list hardening in the important quarter beginning at the end of the first hour.

Trading during the forenoon, and session was characterized, however, by a degree of caution, although the continued ease of money, that is to say, call loans, which opened at 6 per cent, later falling to 4, offered renewed encouragement to the long account.

Outstanding features included the Texaco company at an advance of 12 points, American International, United Cigars, U. S. Rubber, General Motors and half a score of unclassified specialties at gains of 2 to 6 points, final quotations most by approximating the day's maximums. Sales amounted to 1,300,000 shares.

Foreign bonds failed to reflect reported political changes, broad commodity issues, including the Liberty divisions, were barely steady. Total sales (par value) aggregated \$400,000. Old United States bonds unchanged on call.

New York Stock List.
